a. 异性恋的

(1) a. 可疑的, 不靠谱的

homosexual

a. 同性恋的

partner and men to recognise a potential rival who might seduce their

allowing

partner or leave them raising someone else's child.

易碎的容易剥落的(东西)
flaky egg rolls
酥脆的蛋卷

leave sb doing sth

导致 sb 需要面对 sth.

实验过程

Writing in the journal Royal Society Open Science, researchers

《皇家学会开放科学》

described how they asked heterosexual white participants to judge the

that

facial features of 189 white adults who had been photographed and taken
part in previous research. v. 拍照, 摄像

研究结果

The results showed men and women as a whole gave higher scores of
unfaithfulness to the images of men who had self-reported more cheating
or poaching. 作为一个整体, 总体来看

解释

When the team examined what about the men's faces might have
offered clues to their unfaithfulness, they found the standout feature was
how masculine the face appeared. 线索 /ˈstaɪndaʊt/
a. 突出的, 引起注意的

不同的声音

Dr Kristen Knowles, an evolutionary psychologist from Queen
Margaret University in Edinburgh, who was not involved in the study, said
it was interesting the research made a clear connection between perceptions
of infidelity and actual infidelity. /ɪnfɪˈdeləti/ that 感知
n. (夫妻或伴侣间的) 不忠行为; 通奸
unfaithfulness 不忠; 通奸

But Knowles stressed it should not be assumed that men with masculine
faces were likely to be unfaithful. "We should be aware that these
behaviours are incredibly complex, and are likely to be influenced by many
factors, including social and cultural effects, personality, genetics and life
experiences," she said. = extremely /dʒəˈnetiks/
性格 n. 基因特征; 遗传学
